

Safe To Say

Valencia

We watched the sunset and we told ourselves to never forget
Just how good it felt to be surrounded
By a town that we knew like the back of our hands
We felt alive, hoped for the very first time

Is it safe to say in the morning you'll come back
And things will be the same
'Cause since the day you left, you know I've
Had a hard time and I want you to know
If you hear these words, won't you please just come back?

It's been a year now
But I still appreciate the sundown
It reminds me somehow things will work out
And I'll fall to your arms, just like I'd always do
It felt so good, it was the very first time I felt alive
Yeah, so alive

Is it safe to say in the morning you'll come back
And things will be the same
'Cause since the day you left, you know I've
Had a hard time and I want you to know
If you hear these words, won't you please just come back?

If I could sing this out loud, I'd scream it to the clouds
And everyone in this town would know what I'm about
Rather die than feel this pain take me over again
It's so hard to let you go

Is it safe to say?

Is it safe to say in the morning you'll come back
And things will be the same
'Cause since the day you left, you know I've
Had a hard time and I want you to know
If you hear these words, won't you please just come back?
