

Sticks and Stones

Valient Thorr

Sticks and stones might break my bones but yr wordsll
never hurt me
the one who cast that first little stone some dayll
have to pass right thru me
i trust that all the good little girls know a mans
gotta do what a mans gotta do
when ya growin up on this earth ya got some problems to
solve and yr buddies will too
but you got to keep that third eye open, the one thats
in the back of yr head
cause when they sneak up on ya, and they stare into its
gaze
watchit when they light that fuse, cause those
fireworks might blow up in yr face
and that might hurt a little bit more than some sticks
and stones

sticks and stones might break my bones but yr wordsll
never hurt me
the one who cast that first little stone some dayll
have to pass right thru me
i trust my instincts but i do not trust my superiors
orders
if we never question our leaders sticks and stones
might stab us in the back
hahahahahahaha you know they say welcome to the
universe? well ill see you at the top baby!
cause thats where i wanna see you, way up at the top,
alright.

sticks and stones might break my bones but yr wordsll
never hurt me
the one who cast that first little stone some dayll
have to pass right thru me
i trust that all the good little girls know a mans
gotta do what a mans gotta do
your sticks and stones might break my bones but
anything you say can be held against you...
haha! oh yeah that's right, you know what im talking
about, huuwahwhahahahwhwhahwhwaa
