

# My Black Siberia

Vallenfyre

Annihilation of wretched lives  
Avarice grips a world too weak to care  
The culmination of mankind's vice  
A holocaust while people stand and stare

My black Siberia  
The spawn of a ravaged domain

Thirsting for tyrants blood  
Conquered liberty betrayed  
Dead bodies stem the flood  
A wasteland again

The dismal cries of wolves resound  
The nameless crowd are trampled to their doom  
Systematic genocide  
Kill the pigs and all that they consume

My black Siberia  
A thousand years left to decay

Save the dispossessed  
Destroying the grotesque
