## Vampire Weekend

## Bryn

Ion displacement Won't work in the basement Especially when i'm not with you Here in the heartland A feelin so startlin I dont know what i should do

Oh Bryn, you see through the dark Right past the fireflies that sleep in my heart You know its easy to see Wait for the season to come back to me

Nights by the ocean A westerly motion That moves california to sea Eyes like a seagull No kansas palm beetle Could ever come close to that free

Oh Bryn, you see through the dark Right past the fireflies that sleep in my heart You know its easy to see Wait for the season to come back to me
