

## Carnage At The Castle

Vampires Everywhere!

To save your life  
I broke the rules far past my memory  
To save your life  
I fought the wolves that plagued your family  
You bestowed the gift  
That broke the silence in my head  
You kissed my lips  
Broken skin burnt from past regrets  
I will fight for you my only one  
Save the night  
The night is ours  
Our love won't fall  
To earn your trust  
I killed your fear I killed all your enemies  
To earn your trust  
I carved your heart on my chest cavity  
You pledged an oath  
That cured the hinger in my head  
You kissed my lips  
Broken skin burnt from past regrets  
Kisses kisses to the dead  
Hypnotizing all that's left
