

Drugfuck

Vampires on Tomato Juice

I was about to fall in love
I was about to fall in love
With a teenie from somewhere but in the end I just don't care
I was about to fall in love
I was about to fall in love
On that party

you - I mean I - I mean we - I mean everyone that I could see
was about to fall in love
Drunk like a russian sailor
Stoned - so stoned that we just kissed the sky
And we cried (and we cried) for the fallen angels - for the forsaken ones

You turned
Into the princess of my heart
When the drugs tore us apart
LSD a'la carte
State of the art

Tears on your virgin face
Blood alongside your model legs
I licked the tears that you cried that night
Sperm allover the place

Am I just dreaming but
I hear you screaming
I can't stop the bleeding
I feel so unconscious
Can't stop these bad hunches

DRUGFUCK!
DRUGFUCK!

i'm just walking in the past
i can't just walk away

Now we have all been there
We have all been on the party
Now we have all been there
We have all been on the party

All the tears that you cried that night are the screams of the fallen
All the tears that you cried that night are the screams of the fallen
I've seen the angels dyin'
All the tears that you cried last night are the screams of the fallen
All the tears that you cried last night are the screams of the fallen
All the tears that you cried that night are the screams of the fallen
All the tears that you cried that night are the screams of the fallen

All the tears that you cried last night are the screams of the fallen.
