

Roads

Vampires on Tomato Juice

Carry us in your motherly hand
Go with us into foreign lands
Lonely as you are

You carry us, you carry us, you carry us, you carry us,
You carry us, you go with us, you carry us, you go with us
(2x)

Felt countless souls passing by
Saw every cloud along the sky - along the sky

This roads - made of tarmac
This roads - no, it's beauty
This roads - there for us
This roads - full of duty

Potholes cover you like scars
You bore the tanks in all the wars

This roads - made of tarmac
This roads - no, it's beauty
This roads - there for us
This roads - full of duty

Carry us in your motherly hand
Go with us into foreign lands
Lonely as you are

You carry us, you carry us, you carry us, you carry us,
You carry us, you go with us, you carry us, you go with us
(2x)

Build by the hands of the past
You'll find the only freedom at last

You carry us away - away from you
You carry us away - away from here

Heat hazes over your skin
You cannot scream and can't give in

You carry us away - away from you
You carry us away!

Would you, would you
Take me to, take me to a place to rest?
Would you, would you
Lead my path in this enigmatic test?

Would you, please, would you, please,
take me away from here?
(5x)
Would you, please, would you, please,
take me away from here now?
