

(V)

Vampires on Tomato Juice

Die... For you... Tonight... To save you...

The voices tell him he should dress like a bat
To be the darkest knight
To be the savior for you all

The voices tell him he should not be afraid
To leave his shadow behind
Once and for all - for all

The voices tell him that he can't leave this town
To fight the evil inside
To save the poor - the poor

And when the night is dark and clear
Fear and the spirit in the atmosphere
We are here - together - always - forever

We will save you
Don't be afraid - we're watching the shadows
We'll protect you
Yes you are safe - the evil is sippin' our spunk
Yes it's true - we are watching over you

We are watchin' over - we are watchin' over you...

They say we're stronger than the grief all around
Inside our chest made of steel
There is a heart of gold

They say we're focusing on good things in life
We leave the shallow behind
So they will fall

We will - save you - we will - lead you...
We have a binocular
