

The Night Is Young (acoustic)

Van Hunt

I hear the calamity of young ideas
Gatherin' around the edge of my ears
And we're waitin' for the bell to end the afternoon
And usher in the evening, yeah

The night is young
We've only just begun
Grab a friend, jump on in
Run from the end till it comes

The mirror has changed my shape
Tomorrow used to be so kind and so far away
Now it's clear when I touch my face
The unmistakable feel of slippin' away

The night is young
We've only just begun
Grab a friend, jump on in
Run from the end till it comes

My past is bigger and brighter than my future
But the struggle is all the same
I fight to mean somethin' in this life I live
The end comes but the
Don't they know I'm still here
Pushin' against the atmosphere
The best of things haven't been shared yet
It just can't be over yet, over yet

(Can they hear me screamin'?)
The night is young
We've only just begun
(Can they hear me screamin'?)
Grab a friend, jump on in
Run from the end till it comes

(Hear me screamin')
The night is young
We've only just begun
(Hear me screamin')
Grab a friend, jump on in
Run from the end till it comes
