## You're My Woman

Van Morrison

You're my woman And you're my woman You bore my child, Lord You bore my child, Lord I want to thank you I want to thank you And no one else will do And no one else will do And no one else will do Baby, yes you, you are my sunshine I am your guiding light To like a ship out in the night Returning for a light I love you I really love you My heart is for you My heart is for you I long to feel you I long to feel you And every time I do And every time I do And every time I do Baby, it's you, you are my sunshine I am your guiding light Just like a ship out in the night Returning for a light, oh yeah And it's really real The way I feel It's really real Lord have mercy Look into my eyes Look into my eyes And you realize And you realize Is really, really, really real In Kingston town now In Kingston town now Walked up and down now Looked at the ground now You went in labor You went in labor And all our friends came through And all our friends came through And all out friends came through Baby, it's you, you are my sunshine I am your guiding light Just like a ship out in the night Returning for a light, oo-we And it's really real The way I feel It's really real Look into my eyes

Look into my eyes

And you realize And you realize It's really, really, really real, oh yeah And you're my woman And you're my woman And you're my woman And you're my woman Lord have mercy Sing it to me And you're my woman Help me sing this song tonight And you're my woman Lord have mercy And you're my woman You're my woman, help me, help me It's really, really, really, really, really real
