Black Bottom Road

In the part of town You don't wanna be found Everybody knows better when the sun goes down As the fog rolls in You never know where you've been Cross that line to another world Black Bottom Road There's only one way in and one way out you know Black Bottom Road Well this black is cold and black is hell You know you're there when you smell that smell It goes on and on and on Black Bottom Road Ya! Once you step outside You hardly know you're alive Welcome to the devil's dance, Lord you've made his day Along side of the road Oh it's a river that flows It's full of rocks and bones and blood And now your fears And it goes nowhere, there ain't no size Never see anybody pass by Better hold on with all your life All your life Black Bottom Road There's only one way in and one way out you know Black Bottom Road Well this black is cold and black is hell You know you're there when you smell that smell It goes on and on and on Black Bottom Road It Goes On and On! And it goes nowhere, there ain't no size Never see anybody pass by Better hold on with all your life All your life Black Bottom Road There's only one way in and one way out you know Black Bottom Road Well this black is cold and dark is hell You know you're there when you smell that smell It goes on and on and on Black Bottom Road Black Bottom Road Black Bottom Road It goes on and on Black Bottom Road Goes on and on! Black Bottom Road Well this black is cold and dark is hell You know you're there when you smell that smell Black Bottom Road Oh, Goes on and on! Black Bottom Road 'Cause time is hell Black Bottom Road
