

Once In A Lifetime

Vandenberg

You needed your freedom, I thought that I needed mine
We both were too young to know, we shouldn't let it go
We went our own ways, and time passed us by
Now when I think of those schooldays, I realize

Once in a lifetime (once in a lifetime), one in a million (one
in a million)
Our love was that special kind that's so hard to find, but we d
idn't realize

Yesterday in and out another town, suddenly saw your face
Right out there in the crowd
You said you were happy, you got someone who treats you right
And I recognize that fire in your eyes, oh girl you should be m
ine, 'cause

Once in a lifetime (once in a lifetime), one in a million (one
in a million)

I've had my share of love, oh I know how to play the game
But there [a feeling gained], I've never been the same
No never been the same, never been the same

Once in a lifetime, one in a million
I know I'm just chasing dreams and I just can't seem to get you
off my mind

Once in a lifetime, one in a million... (repeats out)
