

# Amazing

Vanessa Amorosi

Come to the lime light  
You can let go of me  
Let yourself feel the chemistry  
Music's changing  
The beat is getting loud  
I feel the rising heat from the crowd

I I I I took a step back  
I I I I never seen you like that  
You're so bright

You look amazing from right here  
Up there in the atmosphere  
Shining like a super star  
Come down and take me to where you are  
So we'll be right there, right there  
Together we'll be right there, right there  
We'll be right there  
So amazing

Baby don't worry  
It's ok to lose yourself  
We're all lost in here and don't need help  
Everybody's rushing, everybody's loving life  
And don't you wanna feel, feel alive?

I I I I took a step back  
I I I I never seen you like that  
You're so bright

You look amazing from right here  
Up there in the atmosphere  
Shining like a super star  
Come down and take me to where you are  
So we'll be right there, right there  
Together we'll be right there, right there  
Oh we'll be right there  
So amazing

You're so amazing  
Take me right there

I I I I  
You look amazing  
Up there in the atmosphere  
Shining like a super star  
Come down and take me to where you are  
And we'll be right there, right there  
Together we'll be right there, right there  
Oh we'll be right there  
So amazing

You're so amazing
