

## Xmas Girl

Vanilla Sky

Even though Christmas night  
Is coming i can't feel fine  
Everywhere it's full of lights  
Reminding me the best December  
And the weeks we spent together  
watching every single glass  
looking for the right presents  
to complete my Xmas list

But now I miss something  
Or should I say that I miss you  
And all those small things

You came out from my mind  
I only feel like I'm satisfied  
When you're with me  
I'm lost without you by my side  
Even in the Christmas night  
I need you here with me

Even though the last December  
I thought would have been the last  
Now I can only remember  
The minutes spent

Even though Christmas night  
Is coming I can't feel so fine  
But I can feel it with you
