

I Want to Take You There

VAST

All the stars are far away

But I can still see their light shine
The truth subsides in your silence
I can see straight through your desires

And I want to chase you there
The angels like to hide
The devils like to be
And you can reach... I know it will make you love me more

And I want to chase you there
The angels like to hide
The devils like to be
And you can reach... I know it will make you hate me more

This is your only chance at immortality
I'll give you strength but I cannot give you the key
This is your only chance at immortality
I'll give you strength but I cannot give you
Will not give you the key

Oh you ... you are so pretty when you are
With me.

I want to chase you there
The angels like to hide
The devils like to be
And you can reach for my hand

I want to take you there
I want to take you there
I want to take you there

This is your only chance at immortality
I'll give you strength but I cannot give you the key
This is your only chance at immortality
I'll give you strength but I cannot give you
Will not give you the key

I want to take you there
I want to take you there
I want to take you there
