Turquoise

Looking for a penny on an empty beach I've been looking for a lover who has eyes to see While I'm here I wanna walk with you, hold your hand In the sun, in the sun, in the sun, in the sun

Turquoise is the color I need to get clean The forest burns, and with it something inside me

Looking for a way to leave the world today But the world is gonna leave us all anyway While I'm here I wanna walk with you, and hold your hand In the sun, in the sun, in the sun

Turquoise is the color I need to get clean The forest burns, and with it something inside me

Together, together Together, together Together, in the sun

I need to get clean I need, I need, I need

Turquoise is the color I need to get clean The forest burns, and with it something inside me

I'm looking for a way to leave the world today
