## Where It Never Rains

When I touch your skin A window arrives And I go outside

I see rolling hills Love has arrived I should go outside

We're going where it never rains Into another place All the love I found in you I'm taking with me too

This is the world they left to us

We're going where it never rains Into another place All the love I found in you I'm taking with me too

This is the world they left to us This is the world they left to us

We're going where it never rains Into another place All the love I found in you I'm taking with me too

This is the world they left to us The only world they left to us

The only world they left to us
