

Burn & Fade

Vega 4

I believe we could have had it all
We could have shone like stars
We lost our way
Everything has got to end sometime
We were satelllites
Drifting off into space

I'm alone in the rain
With a movie in my head
About a dream you were in
Where we lost ourselves

Burn and fade away again
Burn and fade away again
Burn and fade away again
For all time

We wished too hard on that
Shooting star
That burned a hole in us
But left a trail in our eyes

I don't need anything
But to know you'll be alright
Chase a dream, don't look back
Where we lost ourselves

Burn and fade away again
Burn and fade away again
Burn and fade away again
For all time x2
