

So Long Forever

Vega 4

I wish I could cry
Your weather feels numb
And the morning so bright
I'm blinded by love

So long forever
So long forever

I try to hold on
As the signal goes out
And the video fades
To the sound of goodbye

So long forever
So long I will remember

And I wish I could dream
And I wish I could see your face
As you came around
(To call)

And your curtain goes down
And your music plays on
The same old song forever more

And I wish I could
(Hold)
And I wish I could hold you tight
And never let you go

So long forever
So long I will remember
So long forever
So long I will remember

So long forever
So long I will remember
So long so long
So long
