I wish I could cry Your weather feels numb And the morning so bright I'm blinded by love

So long forever So long forever

I try to hold on
As the signal goes out
And the video fades
To the sound of goodbye

So long forever So long I will remember

And I wish I could dream
And I wish I could see your face
As you came around
(To call)

And your curtain goes down And your music plays on The same old song forever more

And I wish I could (Hold)
And I wish I could hold you tight And never let you go

So long forever

So long I will remember

So long forever

So long I will remember

So long forever

So long I will remember

So long so long

So long
