

Future

VersaEmerge

Like a fire cold
Like a spiral straight to nowhere
Like a lost arrow
The seed never grows

We missed out on another
Time to find one another
Can't let it go, let me go

I'll meet you in the future
I'll meet you there
My body knows that you can't just let me go
I know you're waiting out there
Lightyears away
This planet works until I can get to yours

Forgetting what I'm told
And I'll never take the safe road
And every word you said
Still circles in my head
We missed out on another
Time to find one another
Can't let it go, let me go

I'll meet you in the future
I'll meet you you there
My body knows that you can't just let me go
I know you're waiting out there
Lightyears away
This planet works until I can get to yours

I know the time it takes
and I know you're worth the wait
You're worth the wait
You made me see the world in a different way
My heart won't work it or open for anyone
Oh I'll wait, I'll wait a lifetime
I'll wait a lifetime

I'll meet you in the future
I'll meet you you there
My body knows that you can't just let me go
I know you're waiting out there
Lightyears away
This planet works until I can get to yours
Until I can get to yours
