

## You'll Never Know

VersaEmerge

You'll never know  
I didn't want it to go the way it went  
South. Not a word from my mouth  
But from the moment I shook your hand I was determined

When I'm near you I don't speak, I barely look  
I'm afraid you'll see it in my face

Each time it, honey, drips right off of my lips  
I never stick, so how'd you get me stuck in this  
Each time it, honey, drips right off of my lips  
And now I wish you never got me stuck in this  
But it won't show and you'll never know  
I'll lay low and you'll never know

You'll never know  
But my left brain took the wrong things  
East, you've got me all crazy  
Come off lazy but I'm more alive on the inside

When I'm near you I can't speak, I never look  
I'm afraid you'll see it in my face

Each time it, honey, drips right off of my lips  
I never stick, so how'd you get me stuck in this  
Each time it, honey, drips right off of my lips  
And now I wish you never got me stuck in this  
But it won't show and you'll never know  
I'll lay low and you'll never know

I was smiling like a lion  
Buried myself inside your neck  
Oh west, clawed my hands around your chest  
North with some regret  
I've never felt like this

Each time it, honey, drips right off of my lips  
I never stick, so how'd you get me stuck in this  
Each time it, honey, drips right off of my lips  
And now I wish you never got me stuck in this  
But it won't show and you'll never know  
I'll lay low and you'll never know
