

Written in the Stars

Vertical Horizon

An empty heart
On the radio
A songbird cries
In the shadows
The air is still
In the fading light
We will not go gentle
Into this good night

We're going back, we're going in
We're gonna burn every failure down
Let's start again in plain sight
'Cause we are written in the stars
In the stars
We are written in the stars

Soldier boy
To the peaceful man
The raging beast
To the fallen land
The fight to live
And the will to die
Just to choose
Yours and mine

We're going back, we're going in
We're gonna burn every failure down
Let's start again in plain sight
'Cause we are written in the stars
In the stars
We are written in the stars
In the stars
We are written in the stars

We're going back, we're going in
We're gonna burn every failure down
Let's start again in plain sight
'Cause we are written in the stars
In the stars
We are written in the stars
