

# Love You Less

Veruca Salt

I got this feeling and I hope it never ends  
In the nighttime I'm your favorite,  
in the daytime we're just friends  
And you know that's how I want it, yeah  
I really must confess  
That I see myself more clearly when I love you less  
I love you less

Don't you know that I can't see  
When you stand in front of me  
And you know that I can't breathe  
When you're right on top of me  
Can't you see that I'm lonely  
When you're lying next to me

I feel so free (now that you're behind me)  
Free (now that you're behind me)  
Free

I count my blessings and I count my lucky stars  
I can count you on my fingers  
That's how small you are  
And I'm really glad it's over, yeah  
I'm glad I passed the test  
Because I used to love you more  
But now I love you less  
I love you less

Don't you know that I can't speak  
When you're talking over me  
And you know that I can't breathe  
When you're right on top of me  
Can't you see that I'm lonely  
When you're lying next to me

I feel so free (now that you're behind me)  
Free (now that you're behind me)  
Free

Falling over and I got you  
It's like a habit and I have to  
It never stops, no it never stops  
But this equation's not about you  
It's only math and I subtract you  
You put the 3 before the 1, 2

I feel so free (now that you're behind me)  
Free (now that you're behind me) [x8]
