

Triage

Veruca Salt

It's now or never, whether we try
I can't remember why

And I can't believe that you were together
I don't believe you let her inside
I can't believe she wrote me the letter
Why did you bother to leave me alive

Alive and ticking inside [x2]

We said forever, until we die
But we're all offenders
We all lie

I can't believe that you were together
I don't believe you let her inside
I can't believe she wrote me the letter
Why did you bother to leave me alive

Alive and ticking inside [x4]

I don't believe that you were together
I can't believe you let her inside
I don't believe she wrote me the letter
Why did you bother to leave me alive...
