

## Triage

Veruca Salt

It's now or never, whether we try  
I can't remember why

And I can't believe that you were together  
I don't believe you let her inside  
I can't believe she wrote me the letter  
Why did you bother to leave me alive

Alive and ticking inside [x2]

We said forever, until we die  
But we're all offenders  
We all lie

I can't believe that you were together  
I don't believe you let her inside  
I can't believe she wrote me the letter  
Why did you bother to leave me alive

Alive and ticking inside [x4]

I don't believe that you were together  
I can't believe you let her inside  
I don't believe she wrote me the letter  
Why did you bother to leave me alive...
