It's now or never, whether we try
I can't remember why

And I can't believe that you were together I don't believe you let her inside I can't believe she wrote me the letter Why did you bother to leave me alive

Alive and ticking inside [x2]

We said forever, until we die But we're all offenders We all lie

I can't believe that you were together I don't believe you let her inside I can't believe she wrote me the letter Why did you bother to leave me alive

Alive and ticking inside [x4]

I don't believe that you were together I can't believe you let her inside I don't believe she wrote me the letter Why did you bother to leave me alive...
