Feel

The Verve

This darkness cooled my light We move to different sides I poured the guilt right over my eyes As I rose to greet the sky I've never felt this before See you dead on the floor I can't recall a single day That's gonna make this pain slip away My senses have been so cold Didn't know how to feel or hold For a second I felt something in you For a second I believed in you And I wanna know And I wanna be And I wanna feel And I wanna know And I wanna be And I wanna feel And I wanna know And I wanna be And I wanna feel And I wanna know And I wanna be And I wanna feel We could, my friend We can We could, my friend We can We should not end I wanna be part of... And I wanna know And I wanna be And I wanna feel
