

Take It Outside

VETO

They'll cast us out
Down the mountainside
When they see that
We were right all the time

They'll hang us in the wood at night
When they see that
We are on the winning side

So we'll hide out in here
Before they take the rest of us outside

They'll burn down cities
And tear the trees up
In one last demonstration
Of their powers

And they'll swell up
Till their heads explode
And that's when we come out
And take back what is ours

We don't need to be silent anymore
And the can't take us outside

A cornered dog is a dangerous dog
And you don't need to listen anymore
To its barking

Just take it outside
And put the rabies-spitting beast down
