

You're Hard to Get

VETO

There used to be giants here
They carried us up
But then you came along
And you swallowed them all

You're hard to get
You're hard to get
You always find a way
To wriggle out of it

There used to be people here
They used to try their best
But then you came along
And talked them out of it

You're hard to get
You're hard to get
You always find a way
To slither out of it

We try our best
We try our best
But you always find a way
To talk us out of it
