

Ode To You

Vicci Martinez

Jupiter, Venus and Mars
They don't really matter
You lived in me through these stars
But you're not there

And a fairy princess
Dances right above me
I smile from far away
Time must go on
But you fear a light it's getting brighter
Too long to take time to even care

yeah yeah

Spinning in circles I dance to your lullaby
The branches keep growing your breath
And keeps me alive (yeah)

Close the way to open
That once was simple
The youngest heart she known
And my strings sing your song
Alive in your story
You see the ode to for you
Let love start for you

And I wait for the space
That your love it only feels
See this life this life it drifts away
You drift away
But you lift you lift me up
So go on fly
So go on fill my air
And lift me up oh
Just come on fly come on
Fill my air and lift me up

Go on just go go on and fly fly
Lift me up... and hang on
lift me up... woah woah yeah yeah
woah woah yeah yeah yeah yeah
la da da la da la da
yeah yeah yeah
lose your way nah nah
