

# Upside Down

Vicci Martinez

All the trees on fire  
Keep on crying they have no water  
And she burns with a pain  
Because she needs the love from the rain  
Blues in your eyes today  
The suns speaking what does she has to say  
What's wrong with this universe  
Does she smile or does she curse  
But I'm upside down from the outside in I look all  
around  
It's where it all begins right where the rainbow ends

I want to break the cycle  
it's just one life we don't have to fight no  
I want to break the cycle let the world unite, let my  
sun shine bright  
But I'm upside down from the outside in I look all  
around  
It's where it all begins right where the rainbow ends

Ohhh upside... i'm upside down

I want to break the cycle  
It's just one life we don't have to fight no  
I want to break cycle let the world unite and let my  
sun shine bright  
But the world keeps turning around and life we just  
keep learning how to roll with this change  
Our hearts just need to be rearranged  
Oh I'm upside down from the outside in... I look all  
around  
It's where it all begins right where the rainbow end  
But I'm upside down from the outside in  
I'm swimming around where it all beings right where the  
rainbowww  
The rainbowww  
Right where the rainbow  
Where the rainbow ends
