

When Lonely Comes Around

Vince Gill

Every morning starts the same old way
Same story just a different day
You think of her even though she's gone
It's never easy moving on

You see her face in every picture frame
Her voice whispering your name
Only memories remain
She's never coming back again

You can hide the pain for a little while
Sunlight feels like rain
Still you try to smile
'Cause nothing's gonna get you down
'Til silence is the only sound
That's when lonely comes around

Turn up the TV and the radio
Call somebody on the other coast
Stay up all night and walk around all day
Chasing her ghost away

Change your attitude and cut your hair
Try to act like you just don't care
Anything to keep her off your mind
Any way to keep on killing time

You can hide the pain for a little while
Sunlight feels like rain
Still you try to smile
'Cause nothing's gonna get you down
'Til silence is the only sound
That's when lonely comes around

And nothing's gonna get you down
'Til silence is the only sound
That's when lonely comes around

No nothing's gonna get you down
'Til silence is the only sound
That's when lonely comes around
