

Who knew that fate was so sublime?  
It's not a remedy  
But it keeps the embers in the fire burning strong  
Though the days and the weeks grow long  
Oh, you could be comforted by just how profound  
One little sound I know, is quiet and ever  
Together we'll watch this time unravels  
We'll watch the heavens travel  
And we'll be fine, and all we see  
The path we choose is destiny

Meteor, calypso, I find it everywhere you go  
Seen it all, 'cause I've been so  
You gotta know what you're looking for  
And every little way you go, it's all you know  
Oh, woah your meteor, oh woah

Maybe you wrote down your name in the sand  
Well I've seen better, plant your heels in the ground  
Waiting patiently, we're carved in a mountain  
A penny in a fountain, the drive alone  
And now you've seen silver wings  
And so much faster things  
Oh, oh oh, they lift you up  
And you need a dream to fly  
Not some paper airplane

Meteor, calypso, I find it everywhere you go  
I've seen it all, 'cause I've been so  
You gotta know what you're looking for  
And every little way you go, it's all you know  
Oh, woah your meteor  
Oh why don't you ride on, yeah  
Why don't you ride on  
Why don't you ride on  
Oh, why don't you ride on

Let it be said that these two  
Felt the awesome power and the tragedy  
Of a love so real that only they could feel  
Waiting patiently, they drifted apart and then together  
Like words uttered by lovers  
Do you think that I'd lie to you  
Woah, if something I could not do  
Gonna move that wing forever  
Just like a

Meteor, calypso, find it everywhere you go  
I've seen it all, 'cause I've been so  
You gotta know what you're looking for  
And every little way you go, it's all you know  
Oh, woah your meteor  
Oh, why don't you ride on  
Why don't you ride on  
Why don't you ride on  
Oh, why don't you ride on, on, on yeah, yeah
