

Led Astray

Viron

I've strayed in the night - so far from the morning light
There's no place to hide - full moon is riding high

Reach for that star - it seems so far!

When the night has come, light my way
Where's the right way home - still I'm led astray!

The darkness of night makes me worry
A shade rushes by my steps in a hurry

Reach for that star - it seems so far!

When the night has come, light my way
Where's the right way home - still I'm led astray!
Dawn is not in sight - and I pray
For a guiding light - that will light my way!
