

## Alpha & omega

Vision Divine

In a very distant time  
I was made of flesh and blood  
I was feeling puissant  
So strong and so brave

There was nothing I could fear  
My years were passing by  
And the silent dust of time  
Alights on me

I did not realize  
How short our lives are  
Into dark we jump  
Once angels call our names

Distant faces of a rolling dice  
Parts of the same game we leave far behind  
Stop your trudging, making questions now  
You'll get the answers when alpha & omega combine

Let your senses fall  
Don't fear your growing haze  
Listen to my secret words  
And try to understand

All the Spirits you can sense  
They come to give you a sign  
All united here we are  
To warn you now

We were what you are  
You are what we were  
You are what they'll be  
Still Angels call your name

Distant faces of a rolling dice  
Parts of the same game we leave far behind  
Stop your trudging, making questions now  
You'll get the answers when alpha & omega combine

Distant faces of a rolling dice  
Parts of the same game we leave far behind  
Stop your trudging, making questions now  
You'll get the answers when alpha & omega combine
