

Experiment

Voivod

Loud echoes from the end
Nothing but a flat lie
All I need is a new world
Create my universe

The four basic forces
Are ready and fixed
All set to prove myself
It really exists
Risk it, try it, find it !

If my body cannot stand
Don't wanna be born again
I have enough of my land
Putting myself in this project
Within a space that's still secret
Am I to blame for future fate ?
A ball of energy, vortex around me
I have to realize, my theory is wise

The four basic forces
Are ready and fixed
All set to prove myself
It really exists
Risk it, try it, find it !

I think I've found the way
I wanna move not stay
Time is fast and so unsafe
Conquest is what I can expect
Without frontiers there's no respect
The less you give the more I take
Burst getting stronger
In atoms smasher
Powerful magnets
Interchanges the mass
Annihilation, a full reaction
The protons travel in a big circle
Meeting in this race
Their mirror-image dematerialized
Body lost its size
Tube without exit
No way out of it
Micro-galaxies, a lot more to see
Magnetic fusion
My self-creation
I'm in the machine
Going through my dreams
Dimension Hatröss
Dimension Hatröss
