

Nuclear War

Voivod

Fast and pure desolation
Lust the blood in my brain
Hard and dry destruction
Wet under the neutron rain
Die in this Holocaust
Streets before...
Scream the deflect attack
Burn before we reload
WAR! A command for blood
The power blast
We scream

death we creep
DIE! Nothing less than

Storm the only weather
Start the directives assassins
Wait and feel your broiling skin

Warm inside the under shelter
Hot as one disappears
Blight in the atomic detention
Rats it's a survival breed
Destroy with deflagration

I have one track it's to kill
You'll never stop me
Running my evil way
With radioactivity
My machine comes at night
For the loud attack
Save your life in the dark
Missiles they strike
Hey! nuclear war!
I'm really up tonight
For my last ride
Never returning at home
I'm gonna die
And I can't escape
The war machine is not save
When the bombs will hit
My face, It will drive me insane
