

# Goodbye Forever

Volbeat

Did you say the thing you wanted?  
Have you ever felt in love?  
A moment where no problems would ever get you down  
Free as an eagle but only for a day (yeah listen)

The final is a warning, wake up before you go  
There'll be no second chances, that day you're on your own  
Let out the feelings, tomorrow may not come

All alone in the dark, move the curtains for once  
See the light life has brought, or goodbye forever  
Take the arms that embrace, no more being afraid  
Feel the sun on your face, or goodbye forever

Were you listening to the evening?  
Have you ever felt the dawn?  
When everything around you told stories from the world  
Dear mother nature speaks louder than you know  
(oh listen)

The final is a warning, Wake up before you go  
There'll be no second chances, that day you're on your own  
Let out the feelings tomorrow may not come

All alone in the dark, move the curtains for once  
See the light life has brought, or goodbye forever  
Take the arms that embrace, no more being afraid  
Feel the sun on your face, or goodbye forever

We are the birth  
We are the end  
We are the souls  
We have a name  
We are the rising and fallen ones  
We are the spirit forever more
