## **Light a Way**

## Volbeat

Down by the lake of Mississippi A boy was born poor and abandoned And as he walk you could hear him yearning For a home and he prays

And by the fields he sang for rising All for his faith and memorizing All of the songs his mother learned from the lord himself

Heaven light a way for a fallen Let me ease the pain from my mother But he feels the deception in his head

Another day was born and rising and on the stool the boy was trying To earn a coin for his mother, and hoping That freedom will lead her away

Mr. Cadillac Blood: Dear little friend I've heard your story
Please take my hand and I'll promise
We'll find a way and we'll be fighting
For your mother, and her wings

Heaven light a way for a fallen Let me ease the pain from my mother But he feels the deception in his head

Heaven light a way for another
Let me ease the pain for a fallen
We are on our way so much stronger
Heaven light the way for another
And he feels no deception in his head
