

# We

Volbeat

It's good to be here, long time no see my dear  
I took the run out to the road to find a way  
But the loneliness broke into tears  
I believe I was wrong but baby  
now I know your love is not a thing  
You throw out in the cold and walked away  
I'm so sorry, please say you forgive

Close your eyes baby and lend me your finger  
Together we walk out as one  
No lonely nights, broken promises or fights will  
return anymore

I remember a time I believe was fine  
But inside my heart broke down in two  
Something inside starts to burn like a fire  
And I knew it was you

We're broken and damned  
But together we'll find a way  
And no longer shall hell awaits  
We will seek all the light in the day  
Cause forever our love will breathe

Close your eyes baby and lend me your finger  
Together we walk out as one  
No lonely nights, broken promises or fights will  
return anymore

I remember a time I believe was fine  
But inside my heart broke down in two  
Something inside starts to burn like a fire  
And I knew it was you

We're broken and damned  
But together we'll find a way  
And no longer shall hell awaits  
We will seek all the light in the day  
Cause forever our love will breathe

We're broken and damned  
But together we'll find a way  
And no longer shall hell awaits  
We will seek all the light in the day  
Cause forever our love will breathe
