## **The Burning Black**

Vomitory

Chemical warfare, a new dawn of terror An insidious fester for mankind Evoking sinister plans of destruction Gather the fallen, upraise the counter attack

Cascades of fire burns all in sight Human bodies burst in the heat Collapsing in flames eaten alive Covered in the chemical burning salvation

Damnation closing in, no remorse or pity No honour in death, no glory for the dead Unprepared to die, nothing left alive A soil well fed with blood, chaos of retaliation

Darkest of nights explodes into chaos Expandable soldiers suffer in silence Machine gun fire eat those alive Suffer the pain from an armour piercing rain

Bleeding eyes Collapsing lungs Hearts explode Skinned alive Ripped of flesh Bursting bodies Death enclose They are no more
