

Gyroscope

Vonda Shepard

You live in cool greys
Hiding in the middle
You shine right through the haze
Undoing my riddle

Straighten me when I'm tilted

You spin me round and round
Untwisted this tornado
When I'm lost I'm really found
Turn my heart to play-dough

Straighten me when I'm tilted
Water me when I'm wilted

You're my gyroscope
Levelling out my fear
Making the blurry clear
Make the far seem near
You're my gyroscope
When I burn to bright
You try to dim my light
But I won't let you no, no

I used to be too shiny
For your darker shades of black
But you let my ray of light shine
Through the armour through the crack

Straighten me when I'm tilted
Water me when I'm wilted

You're my gyroscope
Levlling out my fear
Making the blurry clear
Make the far seemnear
Hey you're my gyroscope
When I burn too bright
You try to dim my light
But I won't let you no, no, no
