

## I Know Him By Heart

Vonda Shepard

There's a secret path I follow to a place  
No one can find, where I meet my  
Perfect someone, I've kept hidden in my mind

Where my heart makes my decisions  
'Til my dream becomes a vision  
And the love I feel makes him real someday

'Cause I know he's out there  
Somewhere, just beyond my reach  
Though I've never really touched him  
Or ever heard him speak

Though we've never been together  
We've never been apart, no we've never met  
Haven't found him yet but I know him by heart

Am I living an illusion?  
Wanting something I can't see  
If I compromise, I'd be living lies  
Pretending love's not meant to be

'Cause I know my heart's worth saving  
And I know that he'll be waiting  
So I'll hold on and I'll stay strong 'til then

'Cause I know he's out there  
Somewhere, just beyond my reach  
Though I've never really touched him  
Or ever heard him speak

Though we've never been together  
We've never been apart, no we've never met  
Haven't found him yet but I know him by heart

No we've never met haven't found him yet  
But I know him by heart, no we've never met  
Haven't found him yet but I know him by heart
