Say The Words

Say the words Say the words

Every light shines on you tonight Making a fool out of me Why won't this love leave me alone All of the people in this smoky room Crowded with faces I know I feel them watching me watch you

Say the words Say the words Say the words So I can leave, it's over

Your eyes are deeper, they are worthy of many words None I can conjure up will do for you But I shouldn't see you 'Cause I know my own motivation It's taking too long for this love To leave me alone

Say the words Say the words Say the words So I can leave, it's over, it's over

Oh love, you worry me When you say, you'll wait forever 'Cause I have another life We just cannot be together, no no

Say the words Say the words Say the words Say them for me I need to hear you say, it's over, it's over

Say the words Say the words Say the words So I can leave, it's over, it's over
