

S is for the sickness we create with each other
Why is for the time that's spent with your brothers
Me I'm contemplating
All the looks in the yes
Beating down the doors
With no place to hide
Only living witness to what I fell inside
Looking past the last laugh
With no reason to cry
When you're from the outside
You've got to stay high
Could it make a difference
That's why you try

Easy come easy go
There's no in between
You're better off realizing
Do your own thing
Do this do that
They wan't you to sing
Gotta hold my own
Don't live out their dream
Stand up beaten down
Strictly for your soul
You pave the way
They want control
Understand pay the man
It's not what it seems
Before you know it
You lose everything

Have you heard the one about the world coming down
I try to make it easy
Try and stay down
What does it mean
Where does it go
Try to make it easy or my minds going to blow
Do you get lost in reality
You've got to realize
It can't change me

This way that way
How does it go
It's got me thinking
Does it mean anything

Hey!.....Is this Symbolic
