

They Always Come Back

Voodoo Glow Skulls

He's jumped on the one way track
And there ain't no coming back
Should have thought before you leapt
Now you're on a crusade to avoid your death
The second time through you've gotta go feet first
Just remember to hold your breath

They always come back

After the storm you'd better hold on tight
Because you never know when you'll have to fight

Get on the good foot and stay in check
Because in the end they always come back

They always come back

He's jumped on the one way track
And there ain't no coming back
Should have thought before you leapt
Because in the end they always come back
