

What You Want

W.E.T.

Time to heal
Time to feel
Baby, I don't know if you know got your back when you
need me to
Talk to me
I can't see
Searchin' for a safe place to land on a shoulder that
you can trust

I'll give you what you want
Give you what you want, what you want from me
I'll give you what you want
Give you what you want, what you want from me
Don't keep me in the dark
My voice inside your heart
What you want, what you want from me
Take what you want, what you want from me

Your brave face
Leave a trace
Hiding all the pain deep within hoping then no one
never sees

I'll give you what you want
Give you what you want, what you want from me

I'll give you what you want
Give you what you want, what you want from me
Don't keep me in the dark
My voice inside your heart
What you want, what you want from me

Listen here
You don't know where to turn
This road is leading nowhere
Feels like everybody let you down
So let me take the wheel
And I'll drive you to a safe place
Where heartache's nowhere to be found

I'll give you what you want
Give you what you want, what you want from me
I'll give you what you want
Give you what you want, what you want from me
Don't keep me in the dark
My voice inside your heart
What you want, what you want from me
What you want, what you want from me
What you want, what you want from me
