

From Bad To Good

Wade Bowen

I can't change the way we're talkin', but tryin' might do us good

I can't change the way the world's spinning, but I sure wish I could

You can't step twice baby in the same river, you can't ever go back in time

Yesterday's over baby, we'll survive

So dance a little closer, laugh about this crazy day

Or lay your head down on my shoulder, and we'll cry the world away

We'll find a tender moment, let it heal up what it should

Love has always kept us going, going from bad to good

From bad to good

Look at all this time we're wasting thinking about what to do

We've got so much more between us and we've always seen the rough times through

I can't handle another quiet moment, being lost means we can only be found

Take my hand, let's turn this thing around
