

London Still

The Waifs

1. I Wonder if you can pick up my accent on the phone
When I call across the country, when I call across the world
,
I can see you in my kitchen, I can picture you now
As you toast to your small town and you drink the happy hour

R: I'm in London still
I'm in London still
I'm in London still

2. I took the tube over to Camden to wander around
I bought some funky records with that old Motown sound
And I miss you like my left arm that's been lost in a war
Today I dream of home and not of London anymore

R:
